

Capital Markets Trading Training Seminar

Who Should Attend:

The target audience for this seminar is finance professionals, persons considering an upgrade of their curriculum vitae (cv), proactive persons who would like to be prepared for the coming International Financial Center (IFC) in Trinidad & Jamaica, private traders seeking to profit from the techniques of professionals and recent graduates seeking practical education to give them an edge in the job hunt.

Duration:

2 days (14 hours with breaks)

Objectives:

At the end of this training seminar participants will have:

- Comprehensive capital markets training
- Acquired the skills to trade Forex confidently
- Learned to trade stocks & CFDs and profit in an up or down market
- Improved trading techniques to increase your earnings
- Gained the understanding of Practical Technical Analysis that is effective and easy. We know people are tired of complicated systems that slows down the trade making process
- Learned our exclusive filtering system to find high probability trades in almost any market
- Acquired the understanding of basic calculations behind your trades that will give an edge that few have
- Deeper understanding of how the international banks really operate when you place a trade. Our trainers know from personal experience, use it to your advantage!
- Learned how to avoid the 4 major causes of losses for traders
- Learned how to generate income while at work/play by learning how to place intelligent 3-Way orders
- Become a better trader-investor if you apply the principles we teach

Course Content & Skills Acquired:

- Equity investing
- CFDs (an equity derivative, this is the future of trading)
- Forex (FX) Overview
- FX Calculations
- 3- Way orders

- Advanced Trading Tactics
